Team PRP Welcomes M&M Auto Parts to its Growing Association
The Virginia Group Brings Trading Opportunities from Three Different Facilities

Louisville, KY (March 16, 2022)— As of this evening, Team PRP, the largest group of independently-owned auto recyclers selling **premium recycled parts**, has increased to 129 members. **M&M Auto Parts** and its three Virginia locations in Stafford, Fredericksburg and Hampton Roads became a part of the growing association earlier this week. The official announcement couldn't come at a more perfect moment, according to Team PRP Executive Director Jarret Hann.

“It’s an exciting time to be in the auto recycling industry! Demand for our premium recycled parts has never been stronger, and Team PRP is growing its network of independent recyclers. M&M has a long history as a major force in the marketplace and we’re excited to add them to the family,” shared Hann.

M&M Auto Parts has been a proud family-owned and operated recycler since 1960 with inventory of more than 150,000 parts, more than 205-thousand square feet of warehouse space and more than 50 acres in its combined facilities.

“Like most auto recyclers, we are always looking for reliable trading partners so we can meet our customers’ requests and we are excited to become part of the Team PRP transportation network. We trust that members will find M&M to be an equally reliable source of parts to help supply their business needs across the United States. We look forward to helping more people experience and enjoy Quality Recycled Original Equipment parts,” stated Jonathan Murrow, M&M Auto Parts Inventory Manager, after the partnership was made.

Team PRP will be adding a truck to the busy 104 route, servicing All Foreign, Lacy’s, Action and Bruce’s to reduce overloads and provide daily pick-up service to M&M.
